This bull is bred for a lot of performance. He is the top 19% for weaning, which is good for old time genetics. The females should have longevity and fertility. He is a Beyond son going back to two of our top donor cows. Use on your best cows and keep all the heifers.

312's mother has now entered the donor pen. She has proven to breed back first cycle every year and has maintained having light birth weight calves. The three daughters we have retained from 7V10 are right on the mark. The maternal grandmother is a daughter of the great Ideal 4465, her granddaughter was the top selling open heifer on Sinclair's sale this year.

Multiple generations of calving ease genetics. Top calving ease bull with 2% for low birth weight and negative EPD.

Heaven gained our biggest supporter in January. We are grateful for the love, guidance & hard work she illustrated throughout the years.

Nothing will give you a better picture of our role model than what Paul Harvey said, "God looked down on his planned paradise and said, "I need a caretaker." So, God made a Farmer."

She'll forever be missed.

Very thick and docile bull and is in the top 7% for docility. His mother, 0G6, is as square as a bear and long as a freight train. She is making her way towards the flush pen.
